SANIKA VISHNU SURASHE

+91-9529474434 | sanikasurashe647@gmail.com | linkedin.com/in/sanika-surashe | github.com/Sanika347 | Pune, India

Professional Summary

Entry-level Business/Data Analyst with experience in data cleaning, SQL, Python, Power BI, and exploratory analysis. Skilled at turning raw data into reports and insights that support business decisions. Google Cloud Data Analyst certified, with hands-on internship experience across structured and unstructured data.

Technical Skills

- **Analytics & BI:** Power BI, Excel, EDA, Data Visualization, KPI Reporting
- **Data & Programming:** SQL, Python, Pandas, NumPy,Scikit-learn, NLP, LangChain, RAG
- **Data Handling :** Data Cleaning, Validation, Transformation, ETL

Professional Experience

Data Engineer Intern Jun 2026 – Present
Alten India *Onsite*

- Cleaned, validated, and transformed company-provided structured data using Python and Pandas to improve data accuracy, consistency, and readiness for downstream analytics.
- Automated recurring data-preparation and validation tasks using Python, reducing repetitive manual effort
- Performed data quality checks to identify missing values, duplicates, inconsistencies, and invalid records, flagging issues to the team for resolution.

Data Scientist Intern Mar 2025 – Aug 2025
Greatway Software Solution *Pune, Maharashtra*

- Performed data collection, extraction, cleaning on structured and unstructured datasets using Python, Pandas, and Regex.
- Supported ML workflows by preparing high-quality datasets, monitoring data trends, identifying anomalies, and evaluating data consistency.
- Automated data-processing and reporting tasks using Python, reducing manual effort and improving workflow efficiency.

Projects

E-Commerce Sales Analytics Chatbot *Deploy Link* Sep 2026

- Analyzed the Brazilian Olist e-commerce dataset across sales, sellers, payments, reviews, and delivery to answer business questions in plain English with charts and summaries.
- Analyzed whether faster delivery drives better reviews by comparing average delivery delay against average review score across all Olist sellers with 10+ orders, filtering out low-volume sellers to keep results reliable
- Built 6 analytics tools covering orders, sellers, payments, reviews, and delivery performance, so non-technical users can explore KPIs without writing queries.
- Containerized the application using Docker Compose and structured the application for scalable deployment and maintenance.

Malicious URL Classification System Python · Scikit-learn · XGBoost · REST API *Deploy Link* Sep – Dec 2025

- Built and evaluated Random Forest, XGBoost, SVM, Logistic Regression, and Naive Bayes models using TF-IDF and regex features; achieved 80% accuracy.
- Deployed the model via a Flask REST API for real-time prediction; performed EDA with Pandas/NumPy and reported results in Power BI.

GCP-Integrated Job Scraper & NLP Match Engine *GitHub* Jan – Apr 2026

- Built a Python-based data collection and processing pipeline that extracts job information from 100+ sources using Workday, Eightfold, and JSON-based crawlers.
- Developed an **NLP-based job matching system** using all-MiniLM-L6-v2 embeddings and cosine similarity to rank jobs against user requirements.
- Built REST APIs using **FastAPI** and designed the application for deployment on GCP Cloud Run/Cloud Functions.

Education

B.Tech – Computer Science Engineering (AI & ML), CGPA: 7.86/10.0 Jun 2021 – May 2025
DIEMS College, Dr. Babasaheb Ambedkar Technological University, Maharashtra

Certification

- Completed Google Cloud Career Launchpad, Data Analyst track. View Certificate
- Data Science Essentials with Python View Certificate
